

GARRETT BLACKMON

FULL STACK DEVELOPER

WORK EXPERIENCE

YELLOW CARD FINANCIAL

Full Stack Developer | January 2019 - Present

Yellow Card Financial is a startup aiming to bring financial equality to developing nations using cryptocurrency.

Website - YellowCard.io

- Performed a complete overhaul/rewrite of a statically generated website in NuxtJs to match new design and branding after receiving direct investment from Binance Labs
- Achieved 9 Google search site-links by adhering strictly to SEO best practices totaling **247k impressions** from search alone within **first 6 months** of release
- Utilized Netlify for easy and automated version control based deployment pipeline
- Integrated a headless CMS to serve all content and image assets allowing a dynamic WYSIWYG experience for the content and marketing team
- Optimized load times by 231%** using webpack package analyzer to strip out unused dependencies, Vuetify in À La Carte mode, lazy loading unseen assets, and code splitting

Android Application - [Play Store](#)

- Developed a web-wrapper android app with over **3,000 active users**
- Ensured legacy support **down to Android 4.4** using BabelJs to transpile ES6 code
- Managed Alpha, Beta, and production rollout through google play console

Rates API - [Charts](#)

- Designed and implemented a cryptocurrency rates RESTFUL API with historical data currently on platform for calculations totaling over **\$2,000,000** in transaction volume
- Leveraged AWS lambda functions to negate server maintenance and idle resources
- Employed infrastructure-as-code to reduce vendor lock-in and increase deployment efficiency

EAGLES SOUTH APARTMENTS

Marketing Associate | October 2015 - January 2019

Eagles South is an off-campus property housing Auburn University Students

- Demonstrated and honed excellent interpersonal communication skills through sales
- Accelerated office workflow with automation and Excel functions
